

Environmental Improvement and Sustainability Portfolio Priorities

Priorities:-

- Managing change and transformation.
- Waste Procurement - continue with identifying a long term solution for the treatment of waste
- Ensure budgets continue to be managed effectively and not overspent
- Investigate additional income opportunities for services - cemeteries, recycling, parklands via the health agenda, the Community Infrastructure Levy etc.
- Progress Your Call campaign for neighbourhood environmental improvements
- Improve hygiene standards of food businesses by promotion of the Food Standards Agency Food Hygiene Rating Scheme – both to the public and businesses

Risks:-

- Waste procurement affordability is not achieved by successful bidder.
- Council budget reductions seeing some services reviewed or no longer delivered, despite a continuation of high service expectations and lack of capacity within the community to take up reduced/ceased services.
- Income levels are not achieved
