

**Investment Rates**

The interest rates for durations of less than a year are represented by LIBID (London Interbank Bid Rate), a reference rate measuring levels at which major banks are prepared to borrow from one another. This is a potential benchmark for the return on the Council's investments, though the rates actually available are constrained by the Council's investment criteria and largely short term investment horizon, designed to ensure cash is available when required.

**Borrowing Rates**

To indicate the potential costs of borrowing to fund the Council's capital programme, the reference point is Public Works Loans Board (PWLB) borrowing rates. The benchmark used is for "Certainty Rate" borrowing of "Maturity" Loans (loans of fixed lump sums, at fixed rates, over periods from 1 to 50 years).

The PWLB is the statutory body which lends to public bodies from Government resources – the Government has declared that it will be abolished at some point in the future, but that the facility for lending at good value will be continued - no date has been proposed for the change.

**PWLB Loans** - Fixed rate loans are repayable by one of three methods:

(a) **Maturity**: half-yearly payments of interest only, with a single repayment of principal at the end of the term.

(b) **Annuity**: fixed half-yearly payments to include principal and interest or

(c) **EIP (Equal Instalments of Principal)**: equal half-yearly instalments of principal together with interest on the balance outstanding at the time.

**Certainty Rates** - a discount - currently 0.20% - is available on new PWLB borrowing to local authorities completing an information request on borrowing intentions to Central Government.

Current PWLB rates have no impact so long as no new longer term borrowing is taken, as all the Council's existing long term debt is at fixed rates.

**LOBO** - LOBO stands for Lender Option, Borrower Option. It means that the lender can increase the interest rate, which gives the borrower the option to repay the loan in full without penalty fees. Public bodies used to be only able to borrow money through government Public Works Loan Board (PWLB) loans, however borrowing from banks in the form of LOBOs was permitted from the early 2000s. LOBOs were made available with low rates (cheaper than then available PWLB rates) so they appeared to be an attractive alternative.

LOBOs have provoked criticism because of high initial profits to the lender from day one, and high subsequent interest rates. It is difficult to exit LOBO loans early unless the lender is in agreement, so they are less flexible, and there is a risk that if/when they are "called", the borrower may find itself having to refinance debt at high rates.

This Council always limited the scale of LOBO borrowing taken, so that it formed part of an overall balanced debt portfolio, while bringing the advantage of initial lower rates.

**PFI** - The private finance initiative is a way of creating "public-private partnerships" (PPPs) by funding public infrastructure projects with private capital.

**BSF** - Building Schools for the Future (BSF) was the name given to Central Government's investment programme in secondary school buildings in England in the 2000s. In Blackburn with Darwen, the schools funded through this scheme are Witton Park High School, Blackburn Central High School and Pleckgate High School.

### **Prudential Indicators**

Prudential Indicators are established mainly to allow members to be informed of the impact of capital investment decisions and to establish that the proposals are affordable, prudent and sustainable. In addressing the debt taken on by the Council, the indicators also deal with treasury issues, in particular the absolute level of debt being taken on (through the Authorised and Operational Borrowing Limits).

It should be noted that a "breach" of a prudential indicator is not necessarily a problem for the Council. Some indicators are more crucial than others, particularly in terms of their impact. If we spend more on the capital programme in total, that is not necessarily a problem if it has no adverse revenue consequences, for instance. Similarly, if we breach the indicator relating to variable interest rate exposure, this can just point to the balance of different types of debt taken up (between at fixed or variable interest rates) being significantly different from that anticipated when the indicator was set.

On the other hand, the Council's ability to borrow from the PWLB is constrained by needing to remain within the Authorised Borrowing Limit the Council has set for itself. If it became necessary to re-shape the Council's overall capital spending and borrowing strategy to the extent that the original Authorised Borrowing Limits were at risk of being breached, it would be necessary to obtain authority from full Council to change the borrowing limits.

**Money market fund** – type of fund investing in a diversified portfolio of short term, high quality debt instruments - provides benefit of pooled investment - assets are actively managed with very specific guidelines to offer safety of principal, liquidity and competitive returns - such funds "ring-fenced", kept fully separate from the remainder of funds managed by the investment house running the fund.

Council only uses highly rated funds - **policy** is to limit to those with long-term credit ratings no lower than A-, but current **practice** is to only use AAA rated with daily access (like instant access bank accounts).
