# Developing a Vision for Digital 2021 - 2024

## Progress and delivery of 2018 - 20 strategy

- Digital Customer Portal & Website
- Microsoft 365 & Teams
- Mobile devices
- Data dashboards
- Adoption of Agile & Design methods (see [Blog](#))

## Current drivers

- Reduced funding
- Pace of change in technology and behaviours post Covid-19
- Volatility and increased cyber threat
- Increased need from residents and service users

## Vision areas

- Borough
- Customer Experience
- High Performing Organisation

## Strategy 2021 – 2024

Strategy explains what we will do to make Blackburn with Darwen a truly digital council and borough over the next three years and beyond.

This is not about technology, it's about enabling positive impacts to the way people live, connect and work. It is our challenge to actively engage with, understand, collaborate and better serve our customers and communities in digital first environments. The increased need for increased social distancing and remote working & living have prioritised the need to accelerate the development of a connected, converged society that enables and includes everyone, in every community. We must use digital to create more engagement, inclusion and opportunities into every corner of our Community.

Our definition of Customer is any citizen, supplier, business or partner that interacts with our services.

### What we aim to achieve

Our customer experience will be effortless, and digital first. Customers' first thought will be to go to our website with a question in mind and come away with the answer they need, and wherever possible apply for the service they need online. No phone call or email required, no confusion as to what happens next - job done. We will focus on increasing digital skills across the borough, better opportunities for our customers through better connectivity, better access, giving increased confidence.

Digital transformation, accelerated through more agile and customer design skills across the Council. This will rapidly improve processes with customer journey design, user research and digital tools, allowing staff to focus on high value activities.

Better understanding of our customers, through the smarter use of joined-up data. We will be using modern technologies to utilise data and insights to continuously improve our services and inform decision making.

As more services are accessible online to our customers and our staff use more digital tools, we need modern infrastructure too. This includes systems that talk to each other, highly reliable hosting and platforms, the best of technology and modern, cloud-based and agile technical architecture.

# Borough : Vision

## Better Digital Access

- Increased choice of Broadband providers
- Driving better prices
- Faster connection speed
- Tackling Digital Poverty
- Access to employment & education

## Connected Place

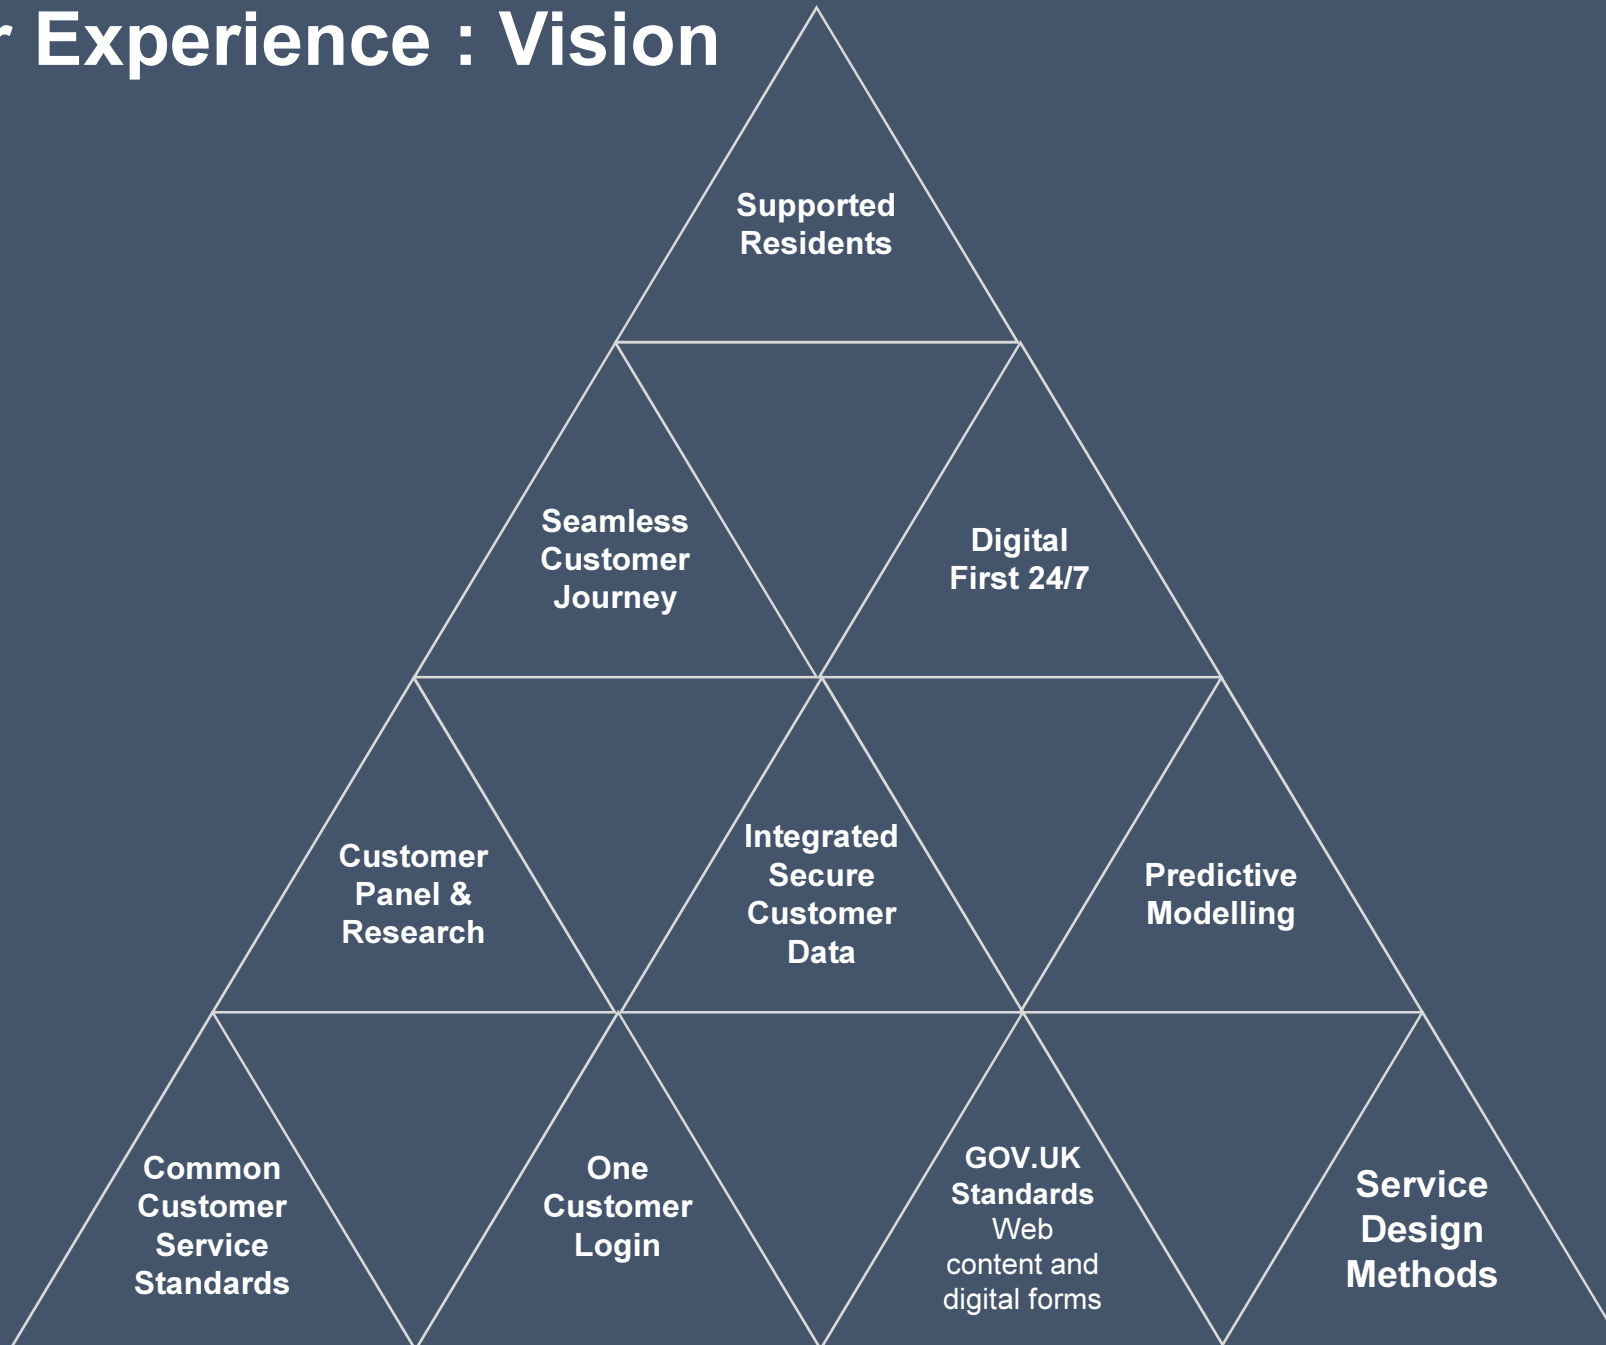

- Infrastructure that future proofs the Borough
- Fast connection for businesses
- Internet of Things
- Cyber secure
- Climate improving

## Digital Skills

- Coordinate public, private and 3<sup>rd</sup> sector skills offer
- Develop advanced digital skills for children and young people
- Align local employer's vision with local school, college and university education offer around advanced digital skills

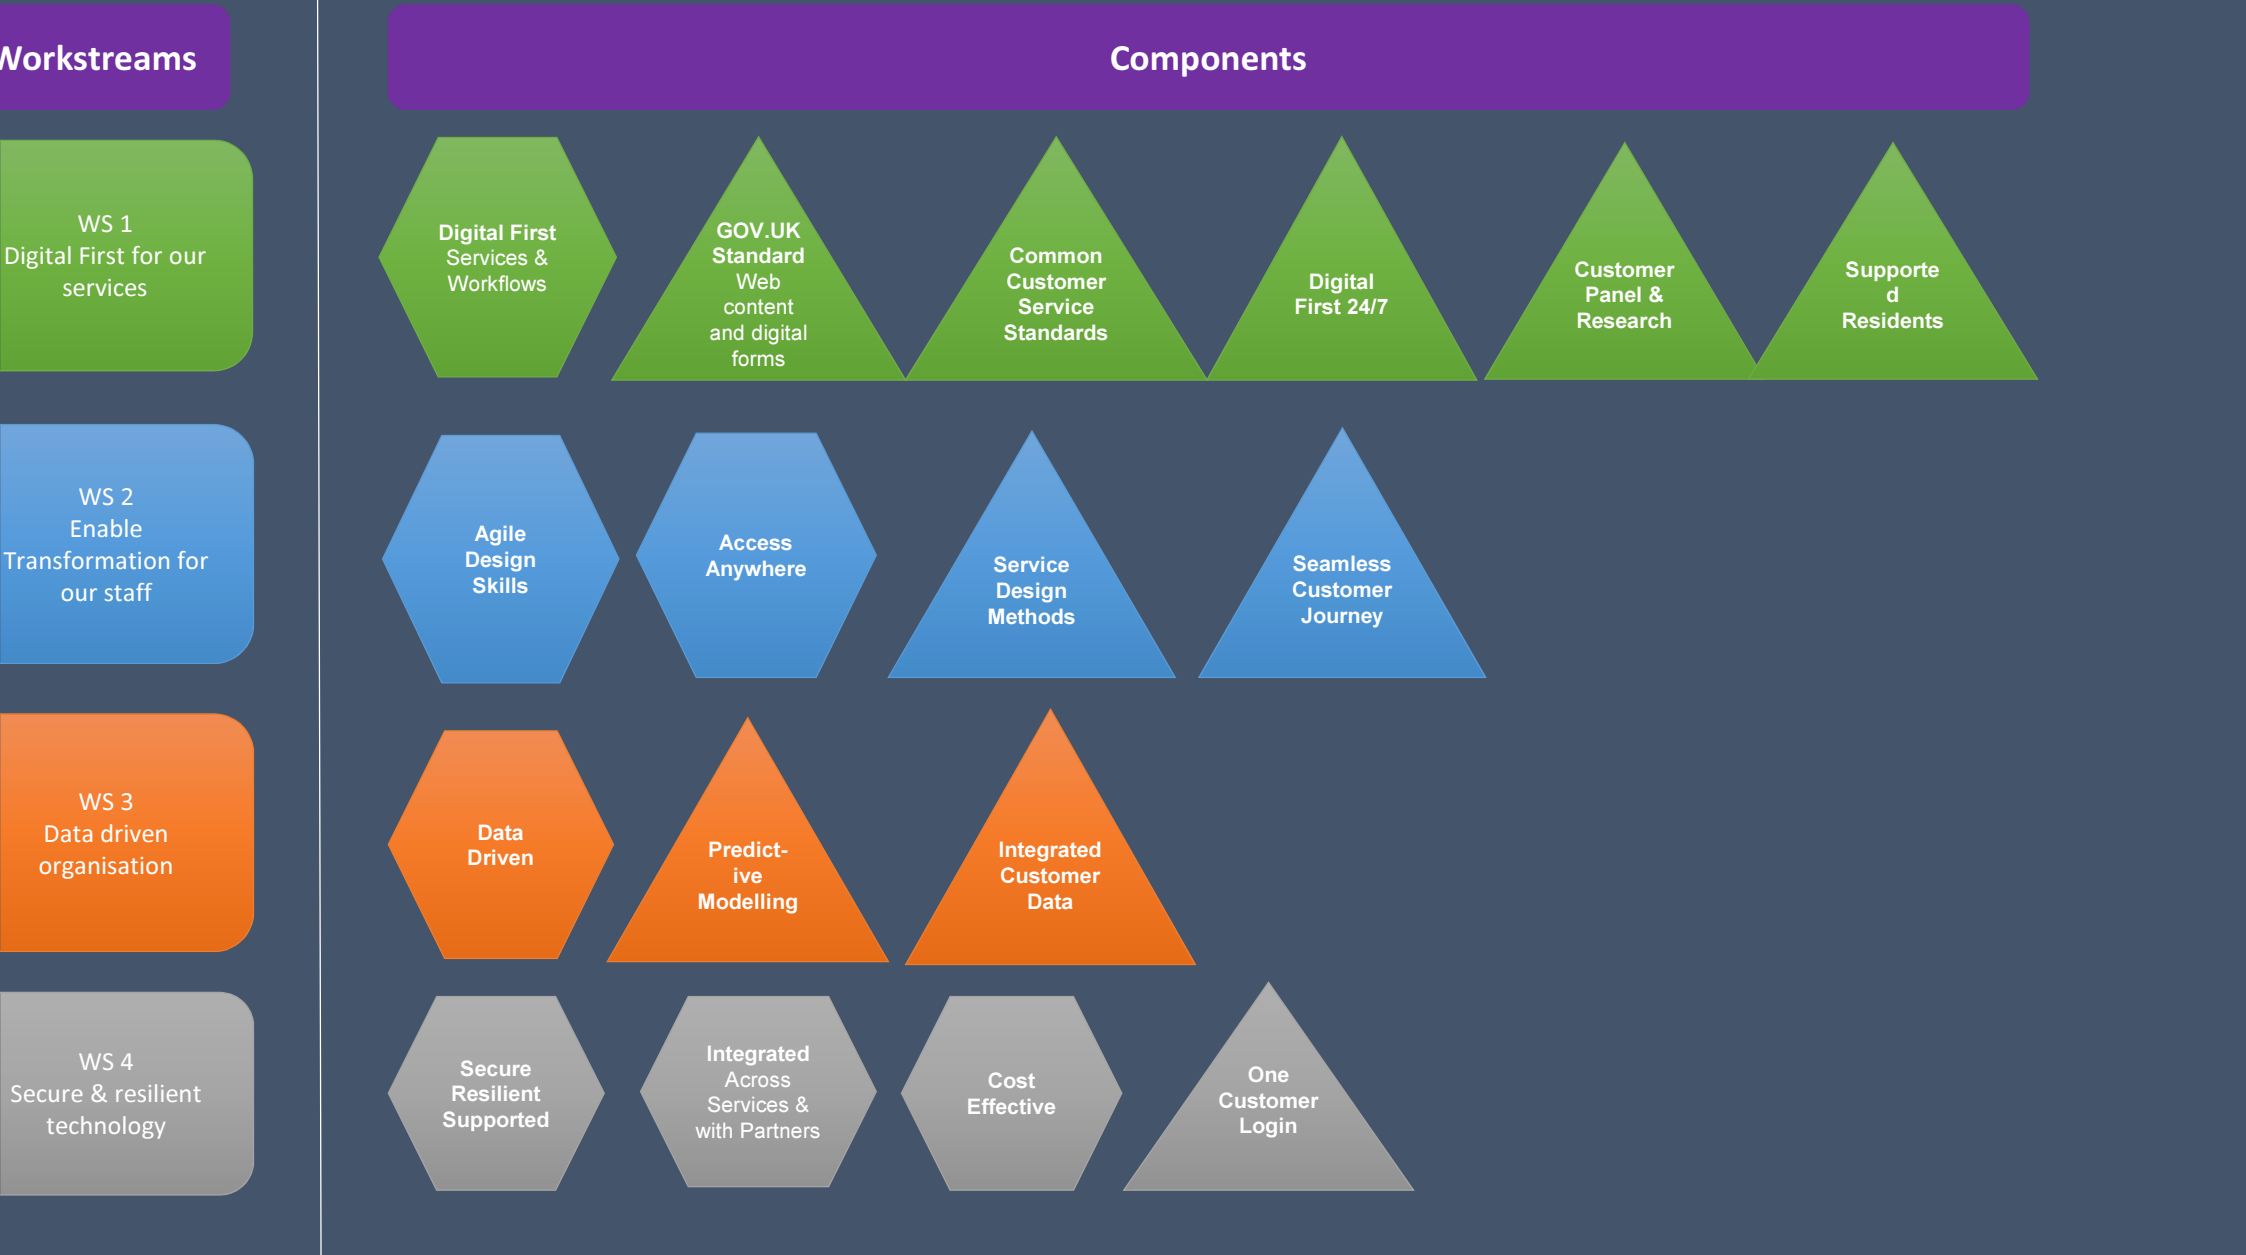

# Customer Experience : Vision

# High Performing Organisation : Vision

# Strategy 2021 – 2024 Workstreams

# Digital Strategy Work Stream 1 - Digital First for our Services

## Outcomes:

Our customers are satisfied with our online services and would recommend a friend to use them

100% of interactions with residents are via our online channels

All customer facing forms are via the Digital Customer Portal.

Enhanced digital assisted services through partnership with 3<sup>rd</sup> sector and the library to support those requiring

assistance and supporting our customers growing their digital skills, in turn providing greater opportunities

All digital services will look and feel consistent as one BwD service to the customer

Services are accessible digitally 24/7

## To achieve this we will:

Deliver customer excellence by working with our customer panel to design our services through insight, iterative design, testing and customer endorsement

Continue to invest in our Digital Customer Portal to span across all council services

Introduce more digital customer channels such as expanded use of webchat

Ensure our web content is dynamic, up to date, accessible and easy to navigate

Use data to drive improvements to our website and digital services

Ensure our Digital Customer Portal replaces smaller independent applications where the functionality allows, reducing complexity and costs of our systems

Focus on integrating line of business systems to the Digital Customer Portal enabling single sign on and a seamless experience for the Customer

Implement a future proofed telephony and contact centre communication system

Reduce the administration burden of our customer services team to allow them to support the digitally excluded

We will design our processes as digital first with the front of house gateways in mind, e.g website, Notify etc

Develop familiar repeatable functionality across all our digital services using Government Digital Service (GDS)

Standards

# Local Strategy Work Stream 2 – Enable Transformation for our Staff

## Outcomes:

- Our leadership demonstrates digital and design thinking, fostering a culture across the organisation
- Our workforce understands and demonstrates agile and service design methods, enabling transformation and cost effective services
- Staff are digitally confident to support customers from a digital perspective
- Our processes are transparent and efficient to our customers
- Our staff are enabled to work effectively on the highest value activities
- All of our staff can access technology and digital tools from anywhere, anytime, reducing the need on our office estate and enabling flexibility

## How we will achieve this by:

- Embedding digital leadership in our core leadership attributes
- Continue to roll out our Agile training and awareness to the workforce
- Develop a Service Design skills course and roll out to identified roles who are redesigning processes
- Create a team of specialist service designers working across the Council to increase the speed of transformation with common design standards and methods
- Continued creation of self led online training of digital tools for staff and councillors that is continually updated and promoted and we will ensure digital skills are evaluated at staff entry stage
- Our processes will be mapped focusing on value add activities, removing historical steps with no value
- We will remove clunky internal processes to increase the effectiveness of the inner workings of the Council
- We will design with our staff, utilising excellent internal engagement and communication tools to reach all staff
- We will continue to replace internal applications to support our transition to Cloud and improving our internal processes
- Encouraging active disruption to current processes and an agile approach to new models of delivery

Seamless Customer Journey

# Local Strategy Work Stream 3 – Data Driven Organisation

## Outcomes:

Improved insights from data so our services are enabled to make more informed decisions, more predictability and effective management of services leading to improved outcomes for our residents  
Increased interventions as a result of deeper insights that improve and reduce demand on services  
Continued collaboration with sharing data for the public good delivering better outcomes for our borough across our partners  
We will have master data for our most common data sets to remove duplication with increased confidence in the data we hold  
Elected Members are confident in accessing and utilising data as part of their roles to support and inform decision making

## How we will achieve this by:

Continuing to put in place the necessary resources and technology to allow for easy appropriate data sharing across the borough  
Using innovative technologies such as machine learning and artificial intelligence to enable the council to better predict future demand  
Collaborating with data specialists from across the Council to contribute and access our growing set of shared data cores and tools  
Growing the skills to increase our use of data, using the digital tools and interpretation of data  
Only procuring applications that allow data to be extracted via open API's (interfaces) and work with existing solutions to do the same  
Improved access to quality, timely insights for our Elected Members through co-design and Member development  
Continue our data and integration programme work across partnerships including the NHS Integrated Care System.

# Strategic Strategy Work Stream 4 – Secure and Resilient technology

## Outcomes:

- We will have a clear architectural vision and roadmap aligned to our organisational priorities
- Our estate is resilient and secure
- We have a cost-efficient and resilient technology estate, proactively managed and regularly reviewed to ensure cost effectiveness
- We have connectivity that works for both residents and staff wherever they are on our estate
- We have full control over the data in all of our back office systems, and are able to extract and analyse that data to improve services
- Our staff are not physically constrained in any way as to where or how they access systems and data

## We will achieve this by:

- Internationally recognised accreditation of our systems and security
- Adoption of a Cloud first strategy
- Continue to consolidate and modernise our Core Infrastructure therefore minimising and then eliminating costly legacy architecture
- Fully mapping and understanding our applications, and infrastructure to prioritise cloud technologies and their strategic value
- Migrating critical services to the Cloud
- Consolidating and rationalising independent applications
- Integrating systems where there is value
- Maximising the capability of applications by working collaboratively with suppliers

# Design Principles - *We will test everything we do against 6 points*

**Customer Centered Design** — We are steered by the research and experiences of our customer panel. Services are accessible, effective, simple and elegant. Delivered when and how the people we serve need them. Our methods are transparent, our work is done in the open.

**Secure by Design** — Our services and systems are secure and compliant with international standards. The information we collect is safeguarded, secure and used appropriately, resulting in high levels of trust by the people we serve.

**Cost and Quality Effective** — Our design decisions deliver evidenced financial returns and quality outcomes across Council services that contribute to our long-term budget sustainability. The people we serve are confident in our use of resources.

**Digital First & Inclusive** — If a process or service can be digitised, it will be. Delivering the highest proportion of people from traditional to digital channels. Coordinated digital inclusion activity mitigates against widening the digital gap and inequalities.

**Data Drives Insight Drives Wisdom** — Data is captured, stored, integrated and leveraged to deliver better outcomes for the people we serve and an effective, transparent organisation.

**Open, Flexible, Cloud First** — Infrastructure, systems and software use open technical standards, are interoperable, scalable and in the Cloud. This infrastructure and our contractual arrangements are dynamic and flexible to the high pace of technological change.

## Digital Investment Projection

The projected investment required to achieve our vision is listed against the 4 overarching work streams. Values are estimates, informed by preliminary planning and discovery work. Detailed business cases with costings will be developed for approval within each work stream throughout the duration of the strategy. Some schemes are already progressing using existing or previously allocated funding. We will fund schemes through cost savings, digital revenue reserves, capital bids and external funding bids.

Work Stream 1 Digital First for our services	Focuses on service design for our Customers with a Digital First focus	Value Required £3.5m Capital £0.5m Revenue	Types of project Further DCP development, Web, Unified Communications, Consolidated Applications, Digital Confidence
Work Stream 2 Enable Transformation for our staff	Focuses on the internal processes within the Council design and maximum automation	Value Required £1.5m Capital £2m Revenue	Types of project Microsoft 365, HR & payroll, Rapid review of existing applications
Work Stream 3 Data driven organisation	Focuses on the build of Power Bi skills and data warehouse	Value Required £0.3m Capital £0.7m Revenue	Types of project Power Bi, Integrations to allow master data, artificial intelligence and machine learning
Work Stream 4 Secure & resilient technology	Focuses on moving our estate to the Cloud and maintaining the necessary investment of infrastructure	Value Required £2m Capital £1m Revenue	Types of project Cloud journey work, Rolling infrastructure programme

## Areas of Success

% Digital access across Customer Service Processes

Increase speed of customers service processing times – Measuring process times for Digital versus original

Reduction in complaints re digital services due to improved service availability

% customers are satisfied with online council services

Increased digital confidence for our staff and our customers – Training delivered to 100% of staff identified

Staff who are confident in maximising technology to achieve outcomes for customers - improved customer feedback, channel shift

Extended Leadership team are all confident users of Power BI and can evidence data insight approaches throughout their services

Total cost of ownership of infrastructure and applications is understood and costs managed within the agreed budget

Critical systems will be available 99.9% of the time

Reduction in the total number of applications supported by 20%
