

EXECUTIVE BOARD DECISION

REPORT OF : Executive Member for Finance and Governance

LEAD OFFICER: Director of Finance

DATE: 12th October 2023

PORTFOLIO/S AFFECTED: All

WARD/S AFFECTED: All

KEY DECISION: YES NO

SUBJECT: TREASURY MANAGEMENT REPORT 2023/24 – Based on monitoring information for the period 1st April 2023 – 30th June 2023

1. PURPOSE

To allow scrutiny of the Treasury Management function.

2. RECOMMENDATIONS

It is recommended that the Executive Board note the Treasury Management position for the period.

3. BACKGROUND

- 3.1 The Treasury Management Strategy for 2023/24, approved at Executive Board in March 2023, complies with the CIPFA Code and with Ministry for Housing Communities and Local Government (MHCLG) Guidance on Investments.
- 3.2 The Council has borrowed and invested substantial sums of money and is therefore exposed to financial risks including the loss of invested funds and the revenue effect of changing interest rates. The successful identification, monitoring and control of risk remains central to the Council's Treasury Management Strategy.
- 3.3 CIPFA published a revised Prudential Code for Capital Finance and Treasury Management Code on 20th December 2021. The key changes in the two codes are around permitted reasons to borrow, knowledge and skills, and the management of non-treasury investments, and there is a change in reporting requirements that requires Treasury Management Prudential Indicators to be reported quarterly.
- 3.1 The principles of the Prudential Code took immediate effect although local authorities could defer introducing the revised reporting requirements until the 2023/24 financial year if they wished. The Council took advantage of the option to defer introducing the revised reporting requirements until the 2023/24 year.

3.2 This report satisfies those requirements and also summarises the interest rate environment for the period and the borrowing and lending transactions undertaken, together with the Council's overall debt position.

3.3 A glossary of Treasury Management terms is appended to this paper.

4. EXTERNAL CONTEXT

4.1. Economic background

4.1.1. From the start of the quarter until May, it looked like peak global monetary policy rates were in sight as inflation continued to ease and central banks turned more dovish in tone. Only a few weeks later, stronger and more persistent inflation data, particularly in the UK, changed the picture.

4.1.2. The UK situation was not welcome news for the Bank of England. GDP growth was weak, confirmed at 0.1% in Q1, although more recent monthly GDP data has been somewhat better. The housing market has stalled, consumer demand is weak but seemingly recovering despite higher interest rates, and labour demand remained strong, with repercussions for wage growth, which is accelerating.

4.1.3. April data showed the unemployment rate increased to 3.8% (3mth/year) while the employment rate rose to 76.0%. Pay growth was 6.5% for total pay (including bonuses) and 7.2% for regular pay, the largest growth rate of the latter outside of the Covid pandemic. Once adjusted for inflation, however, growth in total pay and regular pay remained negative.

4.1.4. Inflation fell from its peak of 11.1% reached in October 2022, but annual headline CPI in May 2023 was higher than the consensus forecast at 8.7% (8.4% expected), largely driven by services inflation, while the annual measure of underlying core inflation rose to 7.1% from 6.8%.

4.1.5. After a sharp rise in interest rate expectations, with clearly serious implications for mortgage markets due to higher inflation and wage data, the Bank of England's Monetary Policy Committee reaccelerated monetary policy tightening over the period with a 0.25% rise in May to a 0.5% rise in June, taking Bank Rate to 5.0%. At both meetings, the vote was 7-2 in favour of increasing rates, with the two dissenters preferring to keep rates on hold.

4.1.6. Interest rate expectations priced in further hikes in policy rates. Arlingclose, the authority's treasury adviser, revised its forecast to forecast a further 0.5% of monetary tightening to take Bank Rate to 5.5%. The risks, however, are that rates could be higher; financial markets are forecasting policy interest rates above 6%.

4.1.7. With many mortgages at low fixed rates now systematically being re-set over the next 12-24 months at higher rates at the end of their fixed rate period, there has been a lagged effect of the feed through of monetary policy on households' disposable income. The economic slowdown is expected to develop over time and therefore, despite the GfK measure of consumer confidence rising to -24 in June, it is likely confidence will be negatively affected at some point. The manufacturing sector contracted during the quarter according to survey data, which will eventually feed into services, whose expansion is slowing.

4.1.8. Despite the US Federal Reserve increasing its key interest rate to 5.00-5.25% over the period, activity in the region continued to defy monetary tightening, particularly in labour markets which

have so far appeared robust, supporting the Fed's assertions of two more rate hikes after it paused in June. Annual US inflation continued to ease, falling from 4.9% in April to 4.0% in May, the lowest level since March 2021. US GDP growth at 2% annualised in the first calendar quarter of 2023 was also significantly stronger than expected against the initial estimate of 1.3%.

- 4.1.9. In the euro zone, the picture was somewhat different. The European Central Bank maintained its hawkish tone and increased its key deposit, main refinancing, and marginal lending interest rates to 3.50%, 4.00% and 4.25% respectively. There were signs of weakening activity, particularly in Germany whose manufacturing sector has taken a hit from high energy prices and weaker global demand. However, inflation remained sticky, annual headline CPI fell to 5.5% in June while annual core inflation rose to 5.4% from 5.3%, which means the ECB is unlikely to stop monetary tightening.

4.2. Financial markets

- 4.2.1. Financial market sentiment and bond yields remained volatile, the latter continuing their general upward trend as uncertainty and concern over higher inflation and higher interest rates continued to dominate.
- 4.2.2. Gilt yields rose over the period. The 5-year UK benchmark gilt yield rose from 3.30% to 4.67%, the 10-year gilt yield from 3.43% to 4.39%, and the 20-year yield from 3.75% to 4.51%. The Sterling Overnight Rate (SONIA) averaged 4.37% over the quarter.

4.3. Credit review

- 4.3.1. Having completed a review of its credit advice on unsecured deposits at UK and non-UK banks, following concerns of a wider financial crisis after the collapse of Silicon Valley Bank purchase of Credit Suisse by UBS, as well as other well-publicised banking sector issues, in March Arlingclose reduced the advised maximum duration limit for all banks on its recommended counterparty list to 35 days.
- 4.3.2. Arlingclose continued to monitor and assess credit default swap levels for signs of ongoing credit stress but made no changes to the counterparty list or recommended durations over the quarter. Nevertheless, heightened market volatility is expected to remain a feature, at least in the near term and, as ever, the institutions and durations on the Authority's counterparty list recommended by Arlingclose remains under constant review.

5. KEY ISSUES

5.1. Investments Made and Interest Earned

- 5.1.1. The graph in Appendix 1 shows the weekly movement in the totals available for investment, both actuals to date and projections for the rest of the year (adjusted for anticipated borrowing where applicable). These balances have fluctuated across the period, ranging between £51M and £90M. Investment balances continued to be unusually high during this period, largely due to funds received from central government and grants received in advance of spend being incurred, including Darwen Town Deal funding of £8.1M and Levelling Up funding of £3.825M. It is intended that investment balances will ultimately reduce in future to between £10M and £20M.

5.1.2. Investments made in the period were mainly in “liquid” (instant access) deposits, either bank “call accounts” or Money Market Funds (MMFs). Returns on MMF holdings remained high over the period, following the Bank Rate increases, averaging around 4.30% throughout the period. Bank deposit account rates have also increased during the period, paying 4.90% by the end of June.

5.1.3. For limited periods, funds were also placed with the Government’s Debt Management Account Deposit Facility (at 4.050% – 4.885%). The other fixed term investments made were:

Start Date	End Date	Counterparty	Amount £	Rate
17/04/2023	17/07/2023	Mid Suffolk District Council	3,000,000	4.23%
02/05/2023	05/07/2023	Northumbria Police Authority	5,000,000	4.25%
15/05/2023	15/06/2023	Wirral MBC	5,000,000	4.40%
15/05/2023	15/08/2023	Cornwall Council	5,000,000	4.43%
22/05/2023	01/06/2023	Ashford Borough Council	5,000,000	4.42%
30/05/2023	30/08/2023	Cheshire East Council	5,000,000	4.50%
31/05/2023	30/11/2023	Birmingham City Council	5,000,000	4.85%
22/06/2023	22/09/2023	Surrey County Council	5,000,000	4.62%
26/06/2023	26/10/2023	Blaenau Gwent	5,000,000	4.48%
26/06/2023	03/01/2024	Dover District Council	5,000,000	4.63%
30/06/2023	07/07/2023	Hertfordshire PCC	5,000,000	5.00%
30/06/2023	05/07/2023	West Yorkshire Combined Authority	2,500,000	5.00%

5.1.4. At 30th June, the Council had approximately £85.5M invested, compared to £50.8M at the start of the period. Appendix 2 shows the breakdown of the closing investment balance. The Council’s investment return over the period was approximately 4.005%. For comparison, as mentioned above, the Sterling Over Night Rate (SONIA) increased over the period, averaging 4.367%.

5.2. Borrowing Rates

5.2.1. The cost of long-term borrowing through the PWLB (Public Works Loan Board) is linked to central government’s own borrowing costs.

5.2.2. The cost of short-term borrowing, based on loans from other councils, has risen during the period, following the Bank Rate rises. Interest rates on loans from 3 months out to a year were priced at rates between 5.15% to 6.00% by the end of the period.

5.2.3. Due to the high level of cash balances, the Council has not been required to use short-term borrowing during the period. Should the need arise we will review the options available.

5.3. Current Debt Outstanding

	31 st March 2023		30 th June 2023	
	£'000	£'000	£'000	£'000
TEMPORARY DEBT				
Less than 3 months	0		0	
Greater than 3 months (full duration)	0		0	
		0		0
LONGER TERM DEBT				
Bonds	18,000		18,000	
PWLB	119,980		119,980	
Stock & Other Minor Loans	22		22	
		138,002		138,002
Lancashire Council County – Transferred Debt		12,496		12,360
Recognition of Debt re PFI Arrangements		57,527		56,941
TOTAL DEBT		208,025		207,303
LESS: TEMPORARY LENDING				
Fixed Term		(33,500)		(62,200)
Instant Access		(17,317)		(23,267)
NET DEBT		157,208		121,836

5.3.1. The key elements of long term borrowing set out above are:

- (a) £18M classed as bonds, borrowed from the money markets, largely in the form of “LOBO” (Lender Option, Borrower Option) debt. The individual loans remaining range from 4.35% to 4.75%, at an average of around 4.4%.
- (b) £120.0M borrowed from the PWLB at fixed rates, at an overall average rate of around 4%. Loans repayable on maturity range from 3.06% to 7.875%, and EIP (Equal Instalment of Principal) loans from 1.7% to 3.77%.
- (c) Debt managed by Lancashire County Council after Local Government Reorganisation, which is repaid in quarterly instalments across the year, charged provisionally at 4.00%.
- (d) Debt recognised on the balance sheet as a result of accounting adjustments in respect of bringing into use school buildings financed through Public Finance Initiative (PFI) arrangements. The Council’s effective control over, and use of these assets is thereby shown “on balance sheet”, with corresponding adjustments to the debt. This does not add to the costs faced by the Council Tax Payer as these payments made to the PFI contractor are largely offset by PFI grant funding from the Government.

5.4. Capital Financing Requirement

5.4.1. The Council's CFR (Capital Financing Requirement) is the key measure of the Council's borrowing **need** in the long term. It is

- (a) the accumulated need to borrow **to finance capital spend** (not funded from grants, etc.)
less
- (b) the accumulated Minimum Revenue Provision (MRP) charges already made - councils must make a prudent MRP charge in their accounts each year, to finance their debt -
less
- (c) any capital receipts applied to finance outstanding debt.

and therefore tends to increase if capital spend financed from borrowing exceeds MRP.

5.4.2. The Council's actual long-term debt is significantly below the CFR – the gap has widened as long-term debt has been repaid. We have been using "internal borrowing" from available revenue cash balances to partly cover this gap which, despite the foregone investment income, has resulted in net interest savings. The position is summarised in the table below.

	2022/23 Actual £M	31 Mar 2024 Forecast £M
General Fund CFR	281.2	291.1
Less: CFR re Debt - Managed by Lancashire County Council (LCC) Re Private Finance Initiative (PFI) Arrangements	(14.8) (68.9)	(14.5) (68.7)
Loans/Borrowing CFR	197.5	207.9
Less: Usable Reserves and Working Capital	(110.3)	(134.2)
Net Borrowing (excludes LCC and PFI debt)	87.2	73.7

5.4.3. CIPFA's 2021 Prudential Code is clear that local authorities must not borrow to invest primarily for financial return and that it is not prudent for local authorities to make any investment or spending decision that will increase the capital financing requirement and so may lead to new borrowing, unless directly and primarily related to the functions of the Authority. PWLB loans are no longer available to local authorities planning to buy investment assets primarily for yield unless these loans are for refinancing purposes.

5.4.4. Borrowing is permitted for cashflow management, interest rate risk management, to refinance current borrowing and to adjust levels of internal borrowing. Borrowing to refinance capital expenditure primarily related to the delivery of a local authority's function but where a financial return is also expected is allowed, provided that financial return is not the primary reason for the expenditure. These changes align the CIPFA Prudential Code with the PWLB lending rules.

5.4.5. The Authority has not invested in assets primarily for financial return or that are not primarily related to the functions of the Authority, and has no plans to do so in future.

5.5. Liability Benchmark

5.5.1. The liability benchmark compares the Authority's actual existing borrowing against a liability benchmark that has been calculated to show the lowest risk level of borrowing. The liability benchmark is an important tool to help establish whether the Council is likely to be a long-term borrower or long-term investor in the future, and so shape its strategic focus and decision-making. It represents an estimate of the cumulative amount of external borrowing the Council must hold to fund its current capital and revenue plans while keeping treasury investments at the minimum level of £10m required to manage day-to-day cash flow.

	31.3.23	31.3.24	31.3.25	31.3.26
	Actual	Forecast	Forecast	Forecast
Loans CFR	197.5	207.9	212.9	215.7
Less: Balance sheet resources	(110.3)	(134.2)	(98.5)	(99.5)
Net loans requirement	87.2	73.7	114.4	116.2
Plus: Liquidity allowance	10.0	10.0	10.0	10.0
Liability benchmark	97.2	83.7	124.4	126.2
Existing borrowing	138.0	134.6	124.4	116.2

5.5.2. Following on from the medium-term forecast above, the long-term liability benchmark assumes capital expenditure funded by borrowing of £5m a year, minimum revenue provision on new capital expenditure based on a 25 year asset life and income, and expenditure and reserves all increasing by inflation of 1% p.a. This is shown in the chart below together with the maturity profile of the Authority's existing borrowing.

5.6. Performance against Prudential and Treasury Indicators

- 5.6.1. Appendix 3 shows the current position against the Treasury and Prudential Indicators set by the Council for the current year.
- 5.6.2. With regard to the movement in the key indicator, Total Borrowing against the Authorised Borrowing Limit, this is shown as the first graph in Appendix 4. Total borrowing at 31st June 2023 was £207.3M, which is below both our Operational Boundary (£301.8M) and our Authorised Borrowing Limit (£311.8M) for 2023/24.
- 5.6.3. During the period we have remained within both our Operational Boundary – which is set for management guidance – and the (higher) Authorised Borrowing Limit. The Authorised Limit is the key Prudential Indicator – any borrowing cannot be taken if this Limit is (or would be caused to be) breached.
- 5.6.4. This total debt includes the impact on the balance sheet of the recognition of assets that have been financed through PFI. The accounting adjustments are designed to show our effective long-term control over the assets concerned, and the “indebtedness” arising from financing the cost of them. They do not add to the “bottom line” cost met by the Council Tax Payer.
- 5.6.5. While the Council currently has no short-term borrowings, it may in the future hold part of its debt portfolio in loans of less than a year’s duration, as short-term loans can still represent a relatively cheap way to fund marginal changes in the Council’s debt requirements. This remains under review, with regular updates from the Council’s treasury management advisors, Arlingclose.

Interest Risk Exposures

- 5.6.6. Our **Variable Interest Rate Exposure** (see second graph at Appendix 4) ended the period at -£72.5M, against the **limit** set for this year of £92.8M.
- 5.6.7. This indicator exists to ensure that the Council does not become over-exposed to changes in interest rates impacting adversely on its revenue budget. The limit is set to allow for short as well as long term borrowing, and takes:
- (a) all variable elements of borrowing (including short term borrowing – up to 364 days – and any LOBO debt at risk of being called in the year), which is then offset by
 - (b) any lending (up to 364 days).
- 5.6.8. Our **Fixed Interest Rate Exposure** was around £125.0M, against the **limit** of £212.1M. This indicator effectively mirrors the previous indicator, tracking the Council’s position in terms of how much of the debt will not vary as interest rates move. The historically low interest rates prevailing over recent decades led the Council to hold a large part of its debt in this way.
- 5.6.9. This limit was set to allow for the possibility of much higher levels of new long-term, fixed rate borrowing.

Other Indicators

- 5.6.10. Forecast Capital Expenditure is detailed in the Quarterly Corporate Capital Budget and Balance Sheet Monitoring Report to Executive Board, which is also on the agenda for this meeting, and includes an analysis of all movements since the Capital Programme was approved by Finance Council on 27th February 2023.

5.6.11. Although capital expenditure is not charged directly to the revenue budget, interest payable on loans and MRP repayments are charged to revenue. The net annual charge is known as the Financing Cost; within the Prudential Indicators, this is compared to the net revenue stream i.e. the amount funded from Council Tax, business rates and general government grants.

5.6.12. A new indicator was added to the Prudential Code for 2023/24, which compares net income from commercial and service investments to the net revenue stream i.e. the amount funded from Council Tax, business rates and general government grants.

6. POLICY IMPLICATIONS

None

7. FINANCIAL IMPLICATIONS

The financial implications arising from Treasury Management activities are reflected in the Council's overall Budget Strategy, and in ongoing budget monitoring throughout the year.

8. LEGAL IMPLICATIONS

The report is in accordance with the CIPFA code and therefore is in accordance with the Financial Procedure Rules under the Council's Constitution.

9. RESOURCE IMPLICATIONS

None

10. CONSULTATIONS

None

11. STATEMENT OF COMPLIANCE

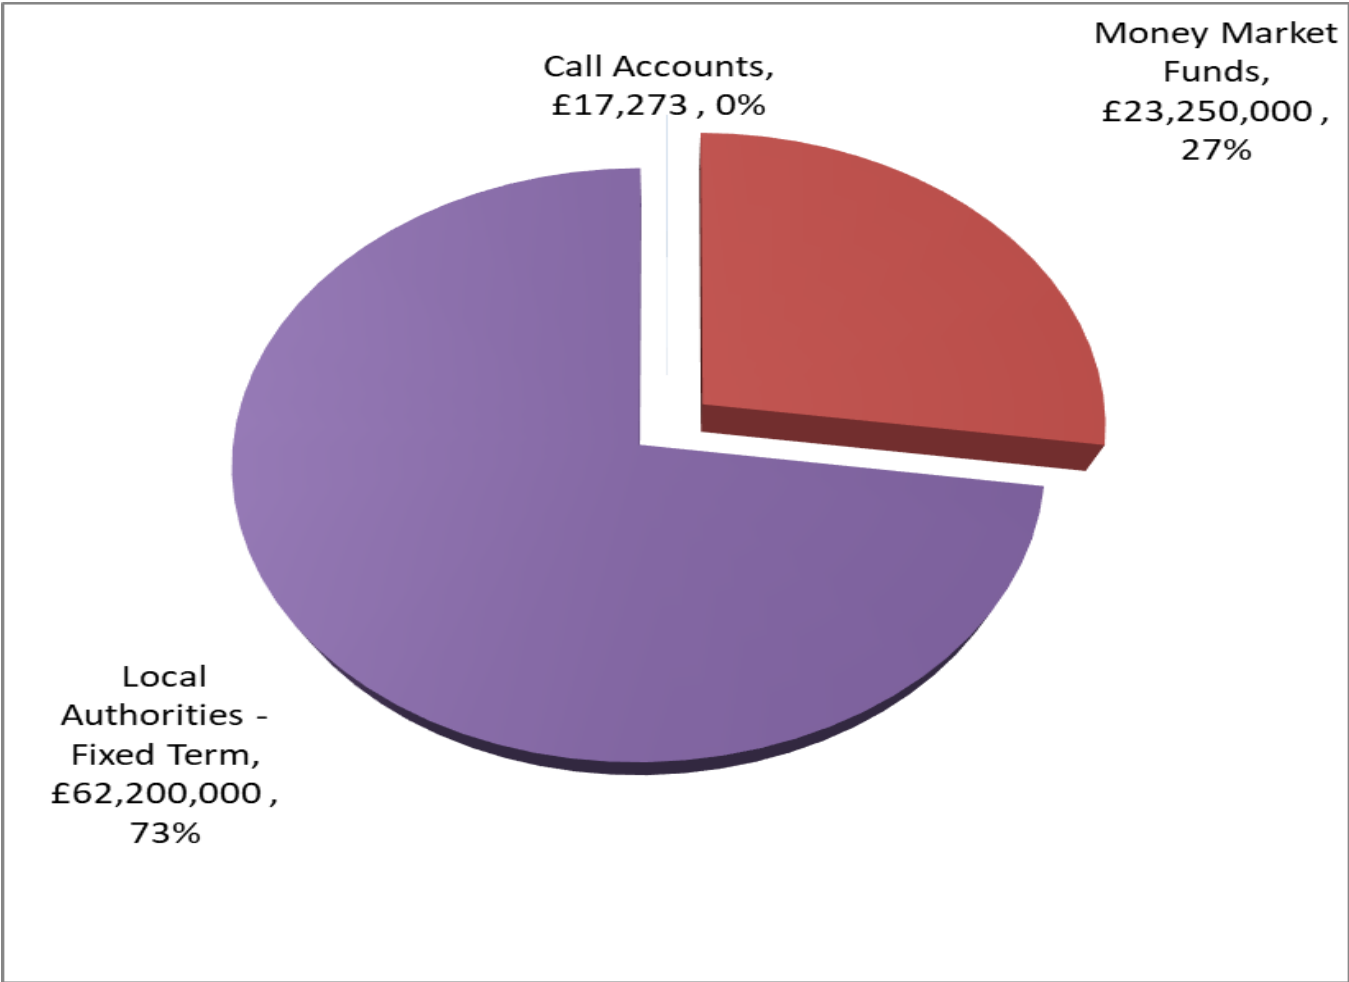

The recommendations are made further to advice from the Monitoring Officer and the Section 151 Officer has confirmed that they do not incur unlawful expenditure. They are also compliant with equality legislation and an equality analysis and impact assessment has been considered. The recommendations reflect the core principles of good governance set out in the Council's Code of Corporate Governance.

Investment Rates

The interest rates for durations of less than a year are represented by LIBID (London Interbank Bid Rate), a reference rate measuring levels at which major banks are prepared to borrow from one another. This is a potential benchmark for the return on the Council's investments, though the rates actually available are constrained by the Council's investment criteria and largely short term investment horizon, designed to ensure cash is available when required.

Borrowing Rates

To indicate the potential costs of borrowing to fund the Council's capital programme, the reference point is Public Works Loans Board (PWLB) borrowing rates. The benchmark used is for "Certainty Rate" borrowing of "Maturity" Loans (loans of fixed lump sums, at fixed rates, over periods from 1 to 50 years).

The PWLB is the statutory body which lends to public bodies from Government resources – the Government has declared that it will be abolished at some point in the future, but that the facility for lending at good value will be continued - no date has been proposed for the change.

PWLB Loans - Fixed rate loans are repayable by one of three methods:

- (a) **Maturity**: half-yearly payments of interest only, with a single repayment of principal at the end of the term.
- (b) **Annuity**: fixed half-yearly payments to include principal and interest or
- (c) **EIP (Equal Instalments of Principal)**: equal half-yearly instalments of principal together with interest on the balance outstanding at the time.

Certainty Rates - a discount - currently 0.20% - is available on new PWLB borrowing to local authorities completing an information request on borrowing intentions to Central Government.

Current PWLB rates have no impact so long as no new longer term borrowing is taken, as all the Council's existing long term debt is at fixed rates.

LOBO - LOBO stands for Lender Option, Borrower Option. It means that the lender can increase the interest rate, which gives the borrower the option to repay the loan in full without penalty fees. Public bodies used to be only able to borrow money through government Public Works Loan Board (PWLB) loans, however borrowing from banks in the form of LOBOs was permitted from the early 2000s. LOBOs were made available with low rates (cheaper than then available PWLB rates) so they appeared to be an attractive alternative.

LOBOs have provoked criticism because of high initial profits to the lender from day one, and high subsequent interest rates. It is difficult to exit LOBO loans early unless the lender is in agreement, so they are less flexible, and there is a risk that if/when they are "called", the borrower may find itself having to refinance debt at high rates.

This Council always limited the scale of LOBO borrowing taken, so that it formed part of an overall balanced debt portfolio, while bringing the advantage of initial lower rates.

PFI - The private finance initiative is a way of creating "public-private partnerships" (PPPs) by funding public infrastructure projects with private capital.

BSF - Building Schools for the Future (BSF) was the name given to Central Government's investment programme in secondary school buildings in England in the 2000s. In Blackburn with Darwen, the schools funded through this scheme are Witton Park High School, Blackburn Central High School and Pleckgate High School.

Prudential Indicators

Prudential Indicators are established mainly to allow members to be informed of the impact of capital investment decisions and to establish that the proposals are affordable, prudent and sustainable. In addressing the debt taken on by the Council, the indicators also deal with treasury issues, in particular the absolute level of debt being taken on (through the Authorised and Operational Borrowing Limits).

It should be noted that a "breach" of a prudential indicator is not necessarily a problem for the Council. Some indicators are more crucial than others, particularly in terms of their impact. If we spend more on the capital programme in total, that is not necessarily a problem if it has no adverse revenue consequences, for instance. Similarly, if we breach the indicator relating to variable interest rate exposure, this can just point to the balance of different types of debt taken up (between at fixed or variable interest rates) being significantly different from that anticipated when the indicator was set.

On the other hand, the Council's ability to borrow from the PWLB is constrained by needing to remain within the Authorised Borrowing Limit the Council has set for itself. If it became necessary to re-shape the Council's overall capital spending and borrowing strategy to the extent that the original Authorised Borrowing Limits were at risk of being breached, it would be necessary to obtain authority from full Council to change the borrowing limits.

Money Market Fund

A Money Market Fund is a type of fund investing in a diversified portfolio of short term, high quality debt instruments - provides benefit of pooled investment - assets are actively managed with very specific guidelines to offer safety of principal, liquidity and competitive returns - such funds "ring-fenced", kept fully separate from the remainder of funds managed by the investment house running the fund.

Council only uses highly rated funds - **policy** is to limit to those with long-term credit ratings no lower than A-, but current **practice** is to only use AAA rated with daily access (like instant access bank accounts).
