Dear Sirs,

Re: Petition to Prevent the Telecommunication Mast at– Livesey Urban Park, Blackburn.

Following on from my enclosed correspondence of Friday 7th June 2019, together with the covenant from the Late Elma Amy Yerburch in respect of the above land; please find enclosed signed petition for your immediate attention.

These 303 signatures are the ones of residents within and around the Livesey area, who disagree with the erection of the Telecommunication Mast.

Should you require any further information, please do not hesitate to contact me.

I look forward to hearing from you in due course.

Yours faithfully

A solid black rectangular box used to redact the signature of Tracey Burgess.

Tracey Burgess.

**PETITION TO STOP THE INSTALLATION OF 25M TELECOMMUNICATIONS
MAST AND ASSOCIATED EQUIPMENT.**

For the Attention of Blackburn with Darwen Council.

We the citizens of the Livesey area of Blackburn, petition to reject the installation of the 25m Telecommunications Mast and associated equipment.

It is suspected that the electromagnetic radiation which they emit may have a detrimental effect on health, our flora and fauna and especially bat colonies. Research on the effects of mast emissions has found that this may cause DNA damage in the brain cells of wildlife. If this is damaging our wildlife, what harm can it have on us? We ask, for safety purposes, that the telecommunications mast is situated outside of a residential area and for this application to be denied.

Dear Rebecca Halliwell,

Please find attached a copy of a petition against the planning application ref: 10/19/0365 for the installation of a 25m telecommunications mast on Livesey Urban Park, signed by the residents of Treetops Close, Feniscowles, Blackburn.

Yours Sincerely

Jayne Williams

**PETITION TO STOP THE INSTALLATION OF 25M TELECOMMUNICATIONS
MAST AND ASSOCIATED EQUIPMENT.**

For the Attention of Blackburn with Darwen Council.

We the citizens of the Livesey area of Blackburn, petition to reject the installation of the 25m Telecommunications Mast and associated equipment.

It is suspected that the electromagnetic radiation which they emit may have a detrimental effect on health, our flora and fauna and especially bat colonies. Research on the effects of mast emissions has found that this may cause DNA damage in the brain cells of wildlife. If this is damaging our wildlife, what harm can it have on us? We ask, for safety purposes, that the telecommunications mast is situated outside of a residential area and for this application to be denied.
