Subject: Re Club Premises Certificate number CP11041

Hello, I am contacting you in relation to the application that is being made to vary the club premises certificate.

I have three particular concerns:

- This application is not known to the wider public of Edgworth, the application is taped to a lamppost outside the cricket club, quite high up and not easy to read. The application is mentioned in Barlow Institute trustees minutes, but I doubt that many read these. I suspect that if there was wider consultation in the vicinity of the cricket club, there would be much more opposition.
- My main concern relates to the comments in Section I, that the doors and windows of the club are shut at 10pm so no noise can be heard locally. That does not reflect the reality and there have been many, many occasions on which the sleep of those in the vicinity of the club (including the elderly residents of nearby [REDACTED]) has been disturbed by ongoing noise emanating from the cricket club at weekends. I know that on one occasion when a local resident sought to get the volume of the music turned down, late at night, he was accused of being against people having fun. That was not the case and the staff member at the cricket club was wilfully missing the point of the resident seeking consideration for the locals.
- Section J of the application seeks extension of the licence to permit drinking up to 2am at weekends. This is simply not acceptable in a residential area. The noise of the departure of revellers from the club after midnight is already bad enough, with taxi doors opening and closing etc, but to extend this by a further two hours seems particularly inappropriate. There are plenty of clubs licenced to sell alcohol to 2am in the Borough, though not many are located in primarily residential areas. For good reason.

I hope that you will take these comments into consideration.
